ABOUT ME

I am a web and mobile application developer from Istanbul, Turkey. I am currently working in a start-up and as freelancer. I am giving lecture videos related to development on Udemy and Youtube. I currently have almost 13 thousand students in total. Besides, when studying Physics, I took courses which are related to data science. So I can clean and analyze a datasets. I know SQL and NoSql database models and their queries.

EDUCATION

2013-2020 - Bogazici University - Physics

I have studied Physics department in Bogazici University between 2013 - 2020. I graduated from the department with 2.48 GPA.

EXPERIENCE

2019 - 2020 (Continuing) Bartme | Co-Founder NodeJs - React - React Native Developer

Bartme is a start-up which solves barting issues using virtual coin and value detection. So people can use the apps to bart things through virtual coin.

2016 - 2020 (Continuing) Upwork Freelancer Web and Mobile Application Developer

I am creating nice layouts, systems, webservices and mobile applications on Upwork.
